Tools: Git, Docker, Splunk, Wireshark

PORTFOLIO

<https://github.com/Zorgod-x/portfolio>

PROJECTS

Security Log Analysis: PCAP with Wireshark & Splunk

Analyzed packet captures for security threats; integrated findings into Splunk dashboards for visualization. Full report and samples in portfolio.

Back up script using BASH

— Automation project

Small script that automates the process of taking backups from a local machine to a remote server using rsync. View implementation and testing details in the portfolio.
